

ABSTRACT OF THE DISCLOSURE

[00109] A method and apparatus for an integrated process modeler is described. The modeler comprises a non-technical interface to permit design of a business process by a non-technical user and a technical interface to implement substeps of the process to automate technical aspects of the process by a technical user, using the same process modeler. The resulting process designed to be used by non-technical employees, to automatically lead the non-technical employees through the business process.
