Accelerated Examination Support Document

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

This accelerated examination support document is provided in support of the petition for accelerated examination filed herewith.

There is one claim currently pending in the application. The claim reads as follows:

A covering for composting comprised of an outer protective fabric enclosing an insulating core.

- a. Outer fabric consisting of a ultra-violet (UV) resistant, air and moisture-permeable, synthetic fabric.
- b. Core comprised of thermal-insulating synthetic fibers spaced for air flow.

9(A) References Deemed Most Closely Related:

An Information Disclosure Statement in compliance with 37 CFR 1.98 has been filed herewith citing each of the following references deemed most closely related to the subject matter of the claim.

9(B) Identification of Limitations Disclosed by References:

Current compost coverings are not constructed to provide an all-in-one solution for moderating heat, moisture, and air flow.

9(C) Detailed Explanation of Patentability:

All of the references identified in the IDS failed to reveal any compost covering products that use a “core comprised of thermal-insulating synthetic fibers spaced for air flow.”

No patents or patent applications for this type invention were found.

9(D) Concise Statement of Utility:

The invention as claimed has utility in that it provides for compost acceleration by attempting to optimize the heat, moisture, and air components necessary for microorganism activities.

9(E) Showing of Support under 35 USC 112, First Paragraph:

Support in the disclosure under 35 USC 112, first paragraph, is found in the specification and Figure 1 of the application.

9(F) Identification of References Disqualified as Prior Art under 35 USC 103(c):

None of the cited references are disqualified as prior art under 35 USC 103(c).

Respectfully Submitted,

/Nelson G. Wong/
