TITLE OF INVENTION: METHOD AND APPARATUS TO INDICATE COMMUNICATION IS WANTED OR WAITING

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1510	\$300	\$0	\$1810	10/26/2010

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or <u>Fax</u> (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 663 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 663 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 6-24-2010 has been entered.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- 1. The newly added claims recite similar material as compared to the previously allowed claims hence these new claims can are considered novel as well.
- 2. The table below compares the claims and the examiner notes that the new claim limitations are novel:
- 1. A system to provide an indication to a user of a first wireless communication device located in a vehicle that a communication is waiting or wanted, the system comprising: a first wireless communication device located in a cab portion of the vehicle and available to the user in the vehicle, wherein the first wireless communication device comprises a display indicator: a second wireless communication device located in a trailer portion of the vehicle, wherein the second wireless communication device comprises a satellite communication device;
- 13. A method for alerting a user of a first wireless communication device located in a vehicle that a dispatcher wishes to communicate with the user, comprising: entering into, by a dispatch center, a twoway data communication with a second wireless communication device over a second wireless communication network, wherein the second wireless communication device is located in a trailer. portion of the vehicle and wherein the second wireless communication device comprises a satellite communication device; sending a communication request
- 17. A wireless communication apparatus to alert a user of a vehicle when out of network that a communication is desired, the wireless communication apparatus comprising: a first wireless communication device located in a cab portion of the vehicle and available to the user of the vehicle, wherein the first wireless communication device comprises a display indicator; a second wireless communication device located in a trailer portion of the vehicle, wherein the second wireless communication device comprises a satellite
- 21. (New) An apparatus for alerting a user of a first wireless communication device located in a vehicle that a dispatcher wishes to communicate with the user, comprising: means for entering into, by a dispatch center, a two-way data communication with a second wireless communication device over a second wireless communication network, wherein the second wireless communication device is located in a trailer portion of the vehicle and wherein the second wireless communication device comprises a satellite communication device; means for sending a
- 24. New A nontransitory storage media comprising program instructions which are computerexecutable to implement alerting a user of a first wireless communication device located in a vehicle that a dispatcher wishes to communicate with the user, and which when executed perform the steps of: entering into, by a dispatch center, a two-way data communication with a second wireless communication device over a second wireless communication network, wherein the second wireless communication device is located in a trailer portion of the vehicle

Application/Control Number: 11/345,809

Art Unit: 2617

a dispatch center: a wired data link coupling the first wireless communication device to the second wireless communication device; a first wireless communication network connecting the first wireless communication device to the dispatch center; and a second wireless communication network facilitating two-way data communication between the second wireless communication device and the dispatch center, wherein when the first wireless communication device is outside of the first wireless communication network, the dispatcher can alert the user of the first wireless communication device that the communication is waiting or wanted by causing the second wireless communication device to send a signal over the wired data link to the first wireless communication device causing the display indicator to indicate said alert.

to the second wireless communication device when a first wireless communication device loses connection with the dispatch center over a first wireless communication network, wherein the first wireless communication device is located in a cab portion of the vehicle and available to the user in the vehicle; receiving the communication request at the second wireless communication device; generating a display signal at the second wireless communication device based on the communication request; transmitting the display signal to the first wireless communication device over a wired data link coupling the second wireless communication device to the first wireless communication device; receiving the display signal at the first wireless communication device; and causing a display indicator on the first wireless communication device to indicate said alert based on the display signal, wherein the user is alerted that the dispatcher wishes to communicate.

communication device: a first wireless communication network connecting the first wireless communication device to a dispatch center; a second wireless communication network to facilitate two-way data communication between the dispatch center and the second wireless communication device; and a wired data link coupling the first wireless communication device and the second wireless communication device. wherein the second wireless communication device can send a communication request signal originating from the dispatch center to the first wireless communication device over the wired data link causing the display indicator to indicate an alert when the first wireless communication device loses connection with the dispatch center over the first wireless communication

communication request to the second wireless communication device when a first wireless communication device loses connection with the dispatch center over a first wireless communication network, wherein the first wireless communication device is located in a cab portion of the vehicle and available to the user in the vehicle; means for receiving the communication request at the second wireless communication device: means for generating a display signal at the second wireless communication device based on the communication request; means for transmitting the display signal to the first wireless communication device over a wired data link coupling the second wireless communication device to the first wireless communication device; means for receiving the display signal at the first wireless communication device; rand means for causing a display indicator on the first wireless communication device to indicate said alert based on the display signal, wherein the user is alerted that the dispatcher wishes to communicate.

and wherein the second wireless communication device comprises a satellite communication device: sending a communication request to the second wireless communication device when a first wireless communication device loses connection with the dispatch center over a first wireless communication network, wherein the first wireless communication device is located in a cab portion of the vehicle and available to the user in the vehicle; receiving the communication request at the second wireless communication device; generating a display signal at the second wireless communication device based on the communication request; transmitting the display signal to the first wireless communication device over a wired data link coupling the second wireless communication device to the first wireless communication device; receiving the display signal at the first wireless communication device; and causing a display indicator on the first wireless communication device to indicate said alert based on the display signal, wherein the user is alerted that the dispatcher wishes to communicate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

network.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. D'Agosta whose telephone number is 571-272-7862. The examiner can normally be reached on M-F, 8am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lewis West can be reached on 571-272-7859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
